

# 25 YEAR LIMITED GALVALUME® WARRANTY

Your Roof. For Life.™

Union Corrugating Company warrants that its hot-dipped aluminum-zinc alloy-coated Galvalume® and Galvalume Plus® sheet steel with a coating weight of AZ50 sold for use as unpainted steel building panels erected within the continental United States, Alaska, Hawaii, Canada or the Caribbean, and exposed to normal atmospheric conditions, WILL NOT rupture, fail structurally, or perforate due to corrosion within a period of 20 years and 6 months after shipment from our mill. For a coating weight of AZ55, this period is extended to 25 years and 6 months.

This warranty **DOES NOT APPLY** to sheets exposed at any time to corrosive or aggressive atmospheric conditions, including, **BUT NOT LIMITED TO**:

1. areas subject to salt water marine atmospheres or to constant spraying of either salt or fresh water.
2. areas subject to fallout or exposure to corrosive chemicals, fumes, ash, cement dust, animal waste or its decomposition by-products, carbon black, or fallout from copper, lead, nickel or silver mining or refining operations.
3. areas subject to water run-off from lead or copper flashings or piping or areas in contact with lead or copper.
4. conditions/circumstances where corrosive fumes or condensates are generated or released inside the building.

This warranty **DOES NOT APPLY** in the event of:

1. bends less than 2T inside bend diameter for sheet thicknesses 0.030" and thinner, and less than 4T for sheet thicknesses greater than 0.030"
2. roof or sections of the roof flatter than 1/4:12 slope.
3. mechanical, chemical, or other damage sustained during shipment, storage, forming, fabrication, or during or after erection.
4. forming which incorporates severe reverse bending or which subjects the metallic coating to alternate compression and tension.
5. failure to provide free drainage of water, including, but not limited to, internal condensation, from overlaps and from all other surfaces of the sheets or panels.
6. failure to remove debris from overlaps and from all other surface of the sheets or panels.
7. damage caused to the metallic coating by improper forming (including, but not limited to, roll forming, press braking or embossing) or scouring or cleaning procedures.
8. deterioration of the panels caused by contact with green or wet or pressure-treated lumber, or wet storage stain caused by water damage or condensation.
9. presence of damp insulation, soil, vegetation or other corrosive materials in contact with or in close proximity to the sheets or panels.
10. deterioration to the panels caused by directly or indirectly by panel contact with fasteners or by overdriving the fasteners so as to damage the panel. Selection of suitable long-lasting fasteners to be used with Galvalume® and Galvalume Plus® panels rests solely with the Buyer. Fasteners are to be electrically insulated from the panel surface (e.g., with elastomeric grommets) to prevent dissimilar metal contact.
11. failures caused by acts of God, falling objects, external forces, explosions, fires, riots, civil commotions, acts of war or radiation.
