<input type="checkbox"/>	 <p>1'-0"</p>	<input type="checkbox"/>	 <p>1'-0"</p>
	SOLID, Smooth		VENTED, Smooth

## Disclaimer

The perceived waviness in flat metal commonly known as "oil-canning" is an inherent part of light gauge cold formed metal panels. Union Corrugating Company will not accept "oil-canning" as cause for rejection of panel system. Panels are susceptible to oil-canning due to the wide, flat surfaces. Stiffening ribs located in the flat pan of panels are means of reducing this condition.

By signing below I understand that waves and other surface variations are not reason for rejection of panels provided by Union Corrugating Company.
